3 Year Plan 2022 – 2025

Our 3 year plan is based on 3 pillars, The Environment, Infrastructure and a Stronger Community.

The Environment

The environment we create determines the quality of life for our residents. Our principle aims include the following:

The creation and maintenance of green open spaces. Maintaining the spaces we already have is the obvious primary aim, however our plan is to continue creating such spaces. During 2021, we have created a recreational space in Ibiskus and have fully embellished Gnien 11 ta Frar in ta Zwejt. Our aim for the next 3 years is to create more open spaces. These include the pollinator garden in tal-Propostru, Triq il-Kampanella, redeveloping Gnien George Zarb and Misrah Awrekarja and the creation of a green hub in the centre of San Gwann incorporation Gnien Karen Grech, Misrah Lourdes, and Misrah Lewza. In this area traffic and parking will be allocated below ground and the whole area will be designated as a green open space. In our existing gardens we will be replacing all the light fixtures and wiring to ensure proper lighting and the installation of CCTV in our open spaces. The CCTV will serve as a deterrent for any anti social behaviour and help create a safer environment.

The council has invested heavily in increasing our cleaning services and the results are showing. Our aim is to have a 3-pronged approach to further increase the cleanliness of our locality. These include, 1) increased services and facilities, 2) increased education and informative material to our residents, 3) increased surveillance and enforcement. The combination of these 3 components will be determining factors in our approach for an ever cleaner San Gwann.

For the next 3 years we will continue to monitor and object to any development in both our valleys, Wied Ghomor and Wied Ghollieqa, continue to encourage the participation of our residents, to recycling and separate their waste, encourage the use of alternative means of transport and the planting of more trees and scrubs in our locality.

Infrastructure

Following the reconstruction of a number of streets surfaces and pavements, the plan is to continue to strengthen our infrastructure and accessibility for all. A number of initiatives have been taken to ensure that accessibility in the last 2 years. We will continue to strive to ensure that this work continues in every zone in our locality. The bettering of our infrastructure includes more street furniture like benches and bins, bicycle racks, maintenance of signs and

markings and flood relieve projects. Our plan for the near future is to change the current state of our Cart Ruts. We aim to create a much more ecstastically pleasing perimeter and better accessibility.

Stronger Community

We strongly believe in investing in our locality by investing in our residents. In the past we have worked very closely with our local NGOs, our plan is to continue to strengthen this co operation with them. We believe that by collaborating with these NGOs we are reaching many more people and providing a greater service to the residents. These include our religious community where we plan to continue working closely.

The continued and sustained work with our elderly residents is high on our priority list. This sector of our community required special attention which the council will continue to provide. These include free transportation, pedologist and medical monitoring and the 55+ club which provides a sense of belonging and community spirit. We will continue providing these services and explore any others which we can provide.

We plan to continue working with cat feeders and any other individuals or organization where animal welfare as their mission. Our trace record on animal welfare is very well know and our aim is to continue to work in this field.

Our plan is to continue to encourage reading. We have done a considerable amount of work in our public library and our plan is to continue enhancing the facilities here. We will also be creating open libraries in various areas around the locality.

Our targets are ambitious however our determination to succeed is equally strong. We will do our utmost to ensure a better San Gwann and better quality of life to our residents.
